Primaelux DLX LED fittings Class I.

The fittings have a modern design. They are ideal as lighting in the construction sector, industry, shipyards and for advertising. These fittings are also highly suitable for illuminating buildings and as guidance lighting for sites. The fixture housings are made of high pressure die-cast aluminium with powder coating, and have polished, anodised reflectors. All of our light fittings have safety glass.

DLX LED fittings produce an ultra-high light output with exceptionally low energy consumption.

- Class I suitable for permanent fixture beyond arm's reach
- Sustainable lighting, green label certification
- In compliance with EN 60598
- Light colour 6500 K (daylight)

The class 1 fittings up to 70W come as standard with 5 metres of H07RN-F (neoprene) 3 x 1qmm. with a rubber-moulded plug. The 100W comes with 15 metres of 3x1qmm. The fittings are supplied in a full-colour pack in 4 languages with instructions enclosed.
