Primaelux has further developed the familiar fluorescent hand lamp into the latest generation of LED lighting.

The Led work light has an extremely high light output. The back of the fitting is made from aluminium. This is to achieve effective forced cooling of the LEDs and driver, which extends the life span.

The fitting is shock and impact resistant and ideal as lighting in the construction and other industries and shipyards. The light generates little heat during use, making it ideal for use in small spaces.

- Available in 50W and 80W
- Class I sockets, Class II LED
- Light colour 6500K (daylight)
- On/off switch
- 220/240V, IP 54
