

B&S light® LED Class II

**ALSO AVAILABLE
WITH BATTERY IN 21W**

Visit our website
for more information:
www.boselektro.com

Our new generation of LED fittings 21W, 36W and 50W make use of the latest COB technology. Multi LED chips are grouped to form 1 light source.

The advantages of this are:

- Greater efficiency from 1 light source and a lower chance of dazzling.
- Higher lumen output per watt.
- Longer life as a result of lower working temperature.

COB technology, in contrast to SMD LED, makes use of a larger LED, which produces a powerful light beam. As a result, it is possible to create a beam that is virtually equal to that of the traditional halogen spotlight.

- Class II suitable for within and beyond arm's reach
- Sustainable lighting, green label certification
- In compliance with EN 60598
- Light colour 6500K (daylight), IP 65
- Full polycarbonate body, shock and impact resistant

Models come with 5 metres of H07RN-F 2x1qmm. and moulded plug.

- 21W LED with emergency BW LED, burns for approx. 120min.
